

LA County Community Colleges with High Concentrations of College-Eligible Parolees

Legend

- 1 Los Angeles Southwest College (LA CCD)
- 2 Los Angeles Trade-Tech College (LACCD)
- 3 Compton Community Educational Center (El Camino CCD)
- 4 Mt. San Antonio College (Mt. San Antonio CCD)
- 5 Antelope Valley College (Antelope Valley CCD)
- 6 Rio Hondo College (Rio Honda CCD)
- 7 Los Angeles Mission College (LACCD)
- 8 Los Angeles Valley College (LA CCD)
- 9 Los Angeles Harbor College (LACCD)
- 10 Cerritos College (Cerritos CCD)

Based on current college-eligible active parolees less than a 30 minute drive from the community college, non-overlapping perimeters. 8.11.16

LA County Community Colleges with High Concentrations of College-Eligible Parolees

- Based on addresses of active parolees as of August 2016 with a High School Diploma, GED, other equivalency, or TABE score of tenth grade level or above.
- Does not include formerly incarcerated individuals who are no longer on active parole, and does not include individuals on probation. The addresses of active parolees is a proxy for all formerly incarcerated students but cannot be considered to be an exact match and may contain inaccuracies or omissions.
- This map includes only those colleges located in Los Angeles County. Given the population distribution in California, Los Angeles County colleges consistently dominate the list if the state is examined as a whole. It is respectfully suggested that Los Angeles County be considered separately, despite the fact that it contains multiple community college districts. The County has a well-established network of criminal justice agencies, community groups, and partnerships that is not duplicated in the rest of the state; these agencies, groups and partnerships are almost all County-based. The proximity of the Los Angeles colleges would allow them to develop a community of practice without much travel, and the Los Angeles community of practice can be coordinated with the larger statewide efforts. In addition, LA CCD is entering into a contract with California Forward to develop its reentry plan, so the colleges in that district may be more responsive to a County-based conversation.
- Mapping driving distance in areas where the colleges are close together, like in Los Angeles, results in a potential student being counted for multiple colleges, because the student is a short driving distance from many colleges. The attached map assigns each student to his/her closest district, so that each student is counted only once.
