

Flipgrid

NORTH ORANGE CONTINUING EDUCATION

JANET CAGLEY, BASIC SKILLS PROFESSOR & DISTANCE EDUCATION COORDINATOR

TINA MCCLURKIN, CTE PROFESSOR & SLO COORDINATOR

What is Flipgrid?

- ▶ Flipgrid is a recording app that allows students and instructors to communicate through short asynchronous videos
 - ▶ It is
 - ▶ Accessible
 - ▶ Secure
 - ▶ And FREE!

Flipgrid Accessibility

- ▶ Closed Captions: By default, all new Topics have Closed Captions turned on. Teachers can edit closed captions within their educator account.
- ▶ Immersive Reader: Microsoft's Immersive Reader is built into Flipgrid to help young learners, students with dyslexia, and to translate text. The Immersive Reader helps students with features like reading text out loud, breaking text it into syllables and increasing the spacing between lines and letters.
- ▶ Student-Generated Transcripts: Students can include their own transcripts as an attachment link. The final step before submitting their video they can edit their display name, add a Title, and attach a Link.
- ▶ Text with Video: Students participate using video on Flipgrid and they have a number of options to add text to their video submissions. In addition to attaching a text file, students can style their video with text or drawing. Additionally, students can upload a picture of their text transcript as a sticker to place alongside their video.
- ▶ Accessibility best practices: We make sure Flipgrid is navigable by keyboard, works with voice-over & screenreader technology, font sizes can be increased, and other best practices for accessibility.

Ways to Use Flipgrid

- ▶ Introductions
- ▶ Skill demonstrations/labs
- ▶ Oral presentations such as book reviews
- ▶ Role playing
- ▶ Language practice

Demonstration

► Let's try it out!
